

TOT: MOBILE APP FOR TRAINING FOR EXAMS

Training Over Test: platform and app for training for exams.

Nowadays the development of mobile apps constitutes a new media for established companies to be present in their clients' smartphones, improving the experience and quality of their service. Smartphone app users see in them a new form of purchasing and of getting services just one click away.

THE TECHNOLOGY

Educational instrument based in the development of an online platform and mobile app that enables users access to a pack of questions, problems and tests for training for their academic exams.

APPLICATIONS / USES

- Online platform available for companies and institutions to be able to offer to their students to train them for different exams.
- Universities, Learning centers, Schools and others, that are interested in offering study and supplementary material for their students to use in a mobile manner.
- Individuals interested in preparing the national medical exam.

DEVELOPMENT LEVEL

First app developed for the Only National Exam of Knowledge in Medicine (EUNACOM).

INTELLECTUAL PROPERTY

The online platform and mobile app protected through copyright.

MAIN BENEFITS AND ADVANTAGES

Enables training for exams through smartphones and tables; provides customized information regarding performance, weaknesses and strengths; registers progress; allows study and practice any time of the day and anywhere.

For companies, it upgrades the user experience, stimulates client fidelization and improves the design of tests and learning.

TECHNOLOGICAL OFFER

- Licence of the web and mobile development.
